

# PRECIOUS PEARL POWDER

by Lady Carla Davis, MPH  
*Specializing in Nutrition*

The benefits of **Pearl Powder** have been known since antiquity. History reveals that this special ingredient was valued and utilized by the Empresses of China, as far back as 4,000 years ago. Secret formulas were created by doctors who treated women of the Empresses Court and passed on to each new generation. These Chinese women became famous for their beautiful porcelain-like skin.

Chinese experts believe that **Pearl Powder** eases tension, cools the blood, while nourishing and beautifying the skin. Their research shows that **Pearl Powder:**

- Prevents pigmentation by slowing down the development of melanin, which controls pigment color.
- Filters out potentially damaging rays and helps to correct damage done to the skin by the sun.
- Nourishes and beautifies the skin to create a clear, smooth sheen and radiant glow.

**Pearl Powder** is a natural moisturizer that revitalizes skin cells. It contains 20-22 amino acids (the building blocks of every living organism), B Complex vitamins, and polysaccharides to strengthen muscle tone and metabolism. **Pearl Powder** is derived from the skin of pearls and then ground into a very fine powder. In the processing, temperatures are kept normal, thereby retaining all the effective elements. No chemicals are added.

**Pearl Powder** bestows the skin with the same lustrous sheen that is displayed on a fine pearl.
