

Digitalizing Humanity Implodes

by Lady Carla Davis, MPH

Specializing in Nutrition

GEP Minister for Environment

By now, most humans are aware of the raging war against humanity. For many years, globalists and technocrats have cunningly positioned themselves into powerful positions while most people were preoccupied with daily survival necessities. However, not all is going as planned in the scandemic of the century. The good news is that everything is being exposed like never before, and the globalist agenda for digitalizing humanity is imploding. Their self-proclaimed experts still do not get it!

First and foremost, humans are our most valuable resource because of their humane attributes. To deny humanity is to rob the world of its most valuable asset and higher consciousness. It defies all logic and is the height of inhuman stupidity. Yet, some world leaders and groups (e.g., WEF) and their deranged advisors are determined to turn humans into microchipped subhumans, controlled by their apps and void of humanity.

We need to value and protect humanity. Working with nature instead of against it has immense benefits. History has shown that when people in positions of power go against nature, a destructive crisis occurs to force everything back into balance. The bigger the imbalance, the more damaging the crisis. But, as the Chinese symbol teaches: Crisis = opportunity!

NATURE'S POWER & EDUCATION

Nature is the most powerful energy of all. It has evolved over millions of years to its current state of perfection. For anyone to think they know more or can do better than nature reveals the extent of their ignorance or stupidity. Nature always wins in the end, which can often entail a lot of destruction.

HH Swami Isa's Education for Total Consciousness (ETC) teaches that every topic for study is related to nature. Our inner and outer environments are inseparable! Thus, learning becomes complete when we connect with nature. Being alienated from nature breeds disasters!

Nature has endowed us with five senses, an intellect, and intuition that enables us to observe the miraculous visions and events in the world around us. Our emotion-dominated mind helps to appreciate what we see. Over 70% of what we learn is through visuals in unison with our thinking brain. A seed sprouting, tender leaves emerging, flowers blooming, and babies, birds, and animals growing are all invaluable visual experiences. No amount of textbook or digital app learning can provide the same knowledge. Education that forms part of nature is essential for the well-being of humans and all the planet's inhabitants. The sights and sounds of nature, science, and humane traits should be part of a curriculum, not controlled by digitalized chips or apps. We are an extension of nature, and nature is our extension!

Creativity is an integral part of ETC. Productiveness, experimentation, and artistic/creative expression are fundamental components of every lesson at every age level. They are not extra-curricular activities, electives, or afterthoughts, but vital parts of each class. For knowledge to be digested and assimilated, equal time and emphasis must be provided for theory and practice. Moreover, when students achieve creative or tangible results from their learning, they are more productive in society.

Peer-to-peer cooperation is part of the ETC program, which involves group creative productions, team-building activities, discussions, and school parliaments. Students also actively engage with their parents and community members inside and outside the classroom. Cooperative learning builds up mutual trust, respect, fraternity, respect for differences, empathy, and skills in democratic participation.

ETC employs techniques of association to train both the teacher and the learner to see the relationship between themselves and everything/everyone else they encounter, starting with each other and then with the lesson content. It pivots upon the idea that everything that exists outside of us correlates directly to what is inside us. And therefore, we are interconnected, interdependent, unified beings inhabiting one world.

The need for classes between four walls with desks, apps, screens, or a blackboard is outdated. For discussions with teachers and peers, for experimentation, exercise, and play, outdoor exposure to nature is the best setting.

In a digitalized world, none of this would be possible, and children would become disconnected from nature and humanism. They would lose the ability to think for themselves, be creative, or be productive. For humanity to survive and thrive, there must be a balance between technology and real-life learning connected to nature.

FAMILY BOND & CULTURE

Digitalizing humanity also destroys the family bond and culture that have existed since the beginning of time. Culture is a medley of customs, traditions, art, music, food, fashion, knowledge, and wisdom passed on from each generation — grandparents to grandchildren via parents. Culture and diversity have enriched people for thousands of years. The parent-child bond ensured the survival of each generation and its culture. The documentary *Secrets of the Whales* beautifully depicts this and shows that no species can survive when that bond breaks.

Globalists and technocrats are constantly and aggressively conniving in ways to break that family bond and destroy a culture to capture each new generation. By continuously increasing the cost of living, they force many parents to neglect their families and work long hours to make ends meet. Thus, most children learn from daycare operatives; and worse, parents who work from home use TV and iPads as babysitters while they work OL. Hence, young people are mind-controlled daily via TV, mobile phones, iPads, videos, games, and other media seduction devices. Addictive social media platforms and MSM (mainstream media) captivate millions of people while collecting their data. Children are addicted to their iPads 24/7 at an early age, while adults are addicted and controlled by MSM news channels. In addition, TV and video cartoons and kid shows are full of violence which desensitizes

a child early on. Children are programmed not to listen to their parents to make them more easily mind-controlled consumers. Children are also programmed with war games early on.

Sadly, many parents, especially mothers in my generation, are experiencing communication difficulties, conflicts, disrespect, and hostility with all kinds of ridiculous accusations from their offspring. Interestingly, these young people (in different parts of the country and unknown to each other) all display the same behavior and parrot the same accusations, but without any details or evidence. I suspect this generation was vaccine (MMR) damaged as the actions they portray are the same as the symptoms from MMR vaccine-induced frontal brain damage. If only we knew then what we know now about vaccines!

In a globalist society, seniors are not valued or respected for their wisdom and expertise as they are in Asian or indigenous cultures. Many seniors are put into lonely nursing homes and heavily medicated into an early demise! Most suffer from dementia because of long-term exposure to contaminated food, a toxic environment, and harmful medication.

Differences between the haves and have-nots are expanding exponentially. The never-ending wars and continuous bombing of poorer countries and helpless people divert billions of much-needed tax dollars and resources into the coffers of weapon industries. This is also a modern-day form of human trafficking under the guise of 'refugees.' Plus, it precipitates the destruction of culture and theft of another country's resources. Soon warfare and soldiers will be conducted by AI.

Nothing is glorifying about war! To prevent their children from becoming programmed killers or AI weapon operators for warmongers, parents need to be more selective about the media and games they expose their children to. Also, they need to use their economic power, stop buying violent video games, and stop using TV's violent cartoons as a baby sitter. There are better, healthier options. The foundation built early in life stays with a child for the rest of their life.

FOOD & OUR ENVIRONMENT

The control and operation of agriculture and our food supply by technocrats are disastrously impacting the environment, Mother Earth's inhabitants, and the survival of humanity. Our air, water, and soil are being poisoned daily beyond repair. Plus, our food supply is contaminated daily by tons of toxic chemicals and unhealthy GMOs. Government agencies and medical boards, who are supposed to protect the public, instead serve corporate interests.

Delusional globalists now promote fake GMO food and insects to replace real, wholesome food. However, this fake food is harmful to the human gut and deficient in the nutrients needed to survive and thrive. A simple look at the advisors pushing this junk food reveals how unhealthy their fake food is.

TECHNOLOGY

While advances in mobile phones, smart homes, and other technology offers

some benefits, they also have deadly consequences. Many not-so-smart homes and schools are only wired for wifi with no safer ethernet wiring options. Energy providers are forcing digital smart meters on homeowners by increasing the cost of keeping their analog meters. The convenience of these digital meters increases profits for power companies at the expense of safety for homeowners. Smart meters:

- Emit radiation
- Cause all the wiring in your home to emit radiation
- Cause fires and explosions
- Are hackable and inaccurate
- Invade your privacy and raise your electric bills

Soon these so-called smart homes will be sick homes and smart schools will produce sickly, unproductive students.

5G towers and technology are also invading our neighborhoods and schools without regard for human or environmental safety. **Listen** to [Amin Jabbi's](#) shocking revelations.

Rates of infertility and low sperm count are soaring. Over 57% of children today have a chronic disease! Millions of people can't get through the day without being heavily medicated. Pharma-controlled medical bureaucrats dictate what doctors can and cannot say to their patients or how to treat them. If they deviate from the pharma-controlled narrative, they are threatened with professional destruction. And, far too many have suddenly and mysteriously died!

Even our climate and weather have been hijacked. And, we are being heavily sprayed with a very toxic cocktail of chemicals that is making a lot of people very sick. Weather-geoengineering is now the most dire problem facing humanity. Ecosystems are collapsing at an alarming rate. Most people rarely pay attention to what is sprayed on them from above.

REALITY

There is a massive effort to dramatically reduce the world's population, chip all remaining humans, and control the world through AI. Their virtual characters can't even deal with a phone call properly. Imagine the chaos and breakdowns that would occur if they ran the world via these dysfunctional virtual characters!

Governments no longer govern for the people, by the people, nor are they held accountable to the people. Most members of Congress or Parliament have been 'bought' by industry technocrats. Most world leaders today are despised tyrants who are only in power because of rigged elections, billions of dollars in PAC money, and MSM propaganda. No one uses common sense anymore. Greedy corporate power brokers no longer try to hide their crimes. They know the Justice and Executive branches of government will protect them because they are being blackmailed, threatened, or bought.

Court hearings have revealed that Digital elections are rigged, the MSM (mainstream media) is full of lies and propaganda, and Democracy is a farce.

According to a 30 Nov 22 [article by Dr. J. Mercola](#), at the G20 meeting in Bali, 19 tyrannical leaders declared that a digital vaccine passport, standardized by the World Health Organization (WHO), will be part of international pandemic prevention and response moving forward.

The rule for standardized international vaccine passports will be introduced as a revision to the international health regulations during the next World Health Assembly in Geneva. (Where they plan to sign an agreement to introduce digital passports for international travel even though they know those shots do not prevent disease transmission.)

The G20 recommendations also include the creation of guidelines for a globally coordinated response to crises, “enhanced by a technology-enabled ‘always-on’ global health infrastructure,” and mutual recognition of COVID-19 vaccines made by G20 members.

Liberty Counsel Founder and Chairman Mat Staver issued a warning, saying, "Digital health or vaccine passports along with tracking and tracing apps present a serious threat to freedom. Vaccine passports and tracking apps are about collecting data and control. The vaccine passport is promoted worldwide to limit a person’s ability to leave home, work, shop, dine, travel, attend a public event, or even worship.

COVID is used to advance this dangerous threat to freedom. We must never accept vaccine passports or tracking apps as the new normal. The implications for freedom are significant. Vaccine Passports Are a Gateway for Complete Financial Control.”

The fact that COVID shots do not prevent the spread of infection has been established many times over. This alone proves that vaccine passports are not to contain epidemics. An international vaccine passport is a gateway to complete totalitarian control because the entire control grid around a person gets tied together by it.

Listen to what [US Rep. Dr. Ron Paul](#) at [Campaign for Liberty](#) says about this.

What can we do to change the status quo when [those in control](#) have so much power and ‘we the people’ have lost control? If this sounds depressing, that is because today’s reality is as such! However, they have overplayed their hand, and their agenda is now exposed and imploding. Thus, there is a silver lining and some solutions that would change the outcome if enough people acted in unison and each one did their part. Be the change you seek!

1. Join the **Global Walkout**: <https://globalwalkout.com/>
2. Wake up, pay attention to what is [going on in the sky](#), and make changes! Doing the same thing over and over and expecting different results is insanity!
3. Get Informed from and support independent media outlets and the great [dynamic groups](#) and [people working hard for our freedom](#). See the list of links below.
4. Use your economic power! STOP using drugs and STOP buying from big corporations! They are only powerful because you buy their products!

5. Contact your Representatives and Senators to let them know you know what is going on and that digitalizing humanity and weather geoengineering must stop! Speak up!
6. Connect with and support Moms Across America, learn how to grow your food from Neighborhood Food Network, and feed your children nourishing real food.
7. Join the Global Energy Parliament
8. Balance the use of technology in your home to maintain health and protect humanity for yourself and future generations.
9. Keep reading Masters of Health magazine and share it with all your friends and family.
